SUMMARY

Enthusiastic and driven Engineering student with a strong focus on automation and Robotics Process Automation RPA. Skilled in Java, UiPath, and project management. Excels in developing efficient solutions. Aiming to leverage technical expertise and passion for innovation to contribute to advancing the company's objectives in the field of mechanical engineering.

EDUCATION

Bachelor of Engineering, St. Joseph's Institute of Technology
76% - Mechanical Engineering

07/2021 – 05/2025
Chennai OMR 119

Higher Secondary Education, Padma Adarsh Higher Secondary School
74% - Computer Science

06/2020 – 04/2021
Chennai

INTERNSHIP

FULLSTACK JAVA, RETECH SOLUTIONS PVT LTD

- During my internship as a Full Stack Java Developer, I gained valuable experience in both front-end and back-end development.
- This hands-on experience helped me develop a foundational understanding of full-stack development, bridging the gap between user interface design and database management.

Trainee Engineer, AVASOFT

08/2024 – 09/2024

- Gained hands-on experience in Robotic Process Automation (RPA) by automating repetitive tasks using UiPath, enhancing workflow efficiency and accuracy.
- Developed responsive web pages using HTML and CSS, applying clean code practices and basic UI/UX principles to improve user interaction and visual design.

Quality Control Engineer, KRITI LABS TECHNOLOGIES

02/2025 – Present

- Assisted in IoT-based project development, contributing to hardware integration and data flow optimization.
- Enhanced technical skills through hands-on experience in sensor interfacing, data logging, and real-time system monitoring.

HARD SKILLS

Java – (Basics), **UiPath** – (Intermediate), **Website development** – (Intermediate), **MS Office** – (Intermediate)

LANGUAGE

English

Telugu

Tamil

COURSES

Automation Explorer, UiPath Academy

Email Automation with Studio, UiPath Academy

PDF automation, UiPath Academy

Control Flow in Studio, UiPath Academy

Business English Certification

PROJECTS

Similar documents analysis, (2 Months)

- Developed an RPA solution to automate downloading files from Gmail, saving them to a local folder, and categorizing them based on keywords.
- The process involved secure Gmail access, file storage, keyword-based categorization, and organized file movement.

IRCTC Ticket booking Automation, (2 Months)

- This project focuses on automating the IRCTC web portal to streamline the ticket booking process, making it more efficient and error-free.
- The automation significantly reduces the complexity of booking tickets, especially for uneducated individuals, by simplifying the steps involved.
- Users can easily book tickets by entering basic details such as passenger names and ages.

College Portal Automation, (1 Month)

- This project involves automating the college portal using RPA with UiPath to enhance efficiency and ease of access for students.
- The automation streamlines the process, making it user-friendly and fully automated. Students only need to provide their credentials to access the portal, where all necessary details and functionalities are efficiently managed.
